FROM CLAUDIA ENDLER DESIGNS . . .

Claudia Endler Designs engagement ring with bezel-set oval diamond.

An [oval shape is one of the fancy diamond cuts](#)—with pears, emeralds, cushions, and the like. It's a matter of personal preference, of course, which gem shape you want as the center stone of your engagement ring, but just for fun, I did want to mention that I once read a book by Saul Spero, a New York diamond appraiser and gem consultant, who, after interviewing customers for many years, found that different diamond shapes appeal to people with certain distinct characteristics. [And those who like ovals?](#) According to Mr. Spero: "They are individualistic, creative, well-organized, dependable, and willing to take chances." Well, whether you believe that or not, if you do like ovals and are considering such a cut for your engagement ring, I've found these very individualist and creative new designs for brides-to-be with distinctive style.

Unique One-of-a-Kind Engagement Rings. Free shipping!

The first solitaire ring, here, is from [Claudia Endler Designs](#). How simple and elegant, with its oval diamond in a contemporary bezel setting.

See Important Safety Information Below.

Think about  
**NuvaRing®** instead.

Prescription NuvaRing® (etonogestrel/ethinyl estradiol vaginal ring) is a flexible birth control vaginal ring used to prevent pregnancy.

SCROLL DOWN TO VIEW Important Safety Information

Do not use NuvaRing if you smoke cigarettes and are over age 35. Smoking increases your risk of serious heart and blood vessel problems from combination hormonal contraceptives (CHCs) including heart attack, blood clots, or stroke which can be fatal. This risk increases with age and the number of cigarettes smoked.

- The use of a CHC, like NuvaRing, is associated with increased risks of several serious side effects, including blood clots, stroke, or heart attack. NuvaRing is not for women with a history of these conditions or any condition that makes your blood more likely to clot. The risk of getting blood clots may be greater with the type of progestin in NuvaRing than with some other progestins in certain low-dose birth control pills. The risk of blood clots is highest when you first start using CHCs and when you restart the same or different CHC after not using it for a month.

**NUVARING®**  
(etonogestrel/ethinyl estradiol vaginal ring)  
delivers 0.120 mg/0.015 mg per day
